Engineering News-Record index

CONTENT

Part I – Subject Index

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES – by states or countries; CITIES – by name; BUILDINGS – by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

Part II – Names

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

Part III – Product Manufacturers

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should also be checked: SEWAGE, **see also:** WATER POLLUTION.

The following abbreviations and signs are used:	e – Editorial
RC – Reader Comment	** – Article with several illustrations
CW – Construction Week	* – Illustrated article (if asterisk precedes entry, reference is to a picture with caption only.)
WO – Washington Observer	
B – Brief and Around the World	

ENGINEERING NEWS-RECORD is published every Thursday. There are 25 or 26 issues in each half yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under the present title.
